#### **Katrina Victims Receive Multivitamins, Nourish America Launched**

Ojai, CA—Needy children schooled in the Bay St. Louis-Waveland School District of Mississippi (an area hard hit by Hurricane

Katrina) will receive free daily multivitamins through Vitamin Relief USA. Tishcon Corporation of Westbury, NY, donated the vitamins.

According to school nurses, children in this region are exposed to large amounts of mold and bacteria because of the flooding and are experiencing allergies, asthma, respiratory problems and stress-related illnesses such as headaches and gastritis. Malnourishment also is a major problem among this population.

In separate news, Vitamin Relief USA initiated Nourish America, an organization intended to expand the organization's humanitarian services to include natural, functional and organic foods, beverage products and various health education services. Such programs will bring informational resources, training toolkits and nutrition education directly to communities.
